## Instructions:

The youngest person in the group goes first.

Players then take it in turns to roll the dice.

A player rolls the dice and then moves that number of spaces.

If the player lands on a square that has a sight word, they must try to read **and write** the **covered up** word. If the word is read out correctly, the player gets another turn. If the word is read incorrectly, play passes to the next person.

The first person to reach the final square is the winner.
